Personal Statement

As a Senior Lecturer in Finance, Technology, and Data Science at Queen's University Belfast, I bridge the gap between academic research and industry innovation. My work focuses on applying advanced statistical and machine learning techniques to complex problems in finance, with a particular emphasis on regulatory technology, systemic risk, and ethical AI development in financial services.

I am passionate about fostering interdisciplinary research collaborations that push the boundaries of what is possible in the field of finance. My goal is to equip the next generation of finance professionals with the knowledge and tools they'll need to succeed in a rapidly evolving digital landscape, while also instilling values of ethical decision-making and continuous learning.

Through my teaching, research, and industry engagements, I strive to contribute to the advancement of financial technology and data science, always with an eye towards practical applications and societal impact.

Teaching

Academic Leadership

- Programme Director, PG Cert AI in Finance, Queen's Business School & QUB EEECS, commencing Sept 2025
- Programme Director, MSc Quantitative Finance, Queen's Business School, 2018–2022
- Programme Director, MSc Computational Finance & Trading, Queen's University Belfast, 2014–2018
- Co-Founder, Queen's Student Managed Fund, 2012–

Areas of Teaching Expertise

I have extensive teaching experience at both undergraduate and postgraduate levels, specializing in:

1. **Quantitative Finance**: Delivering advanced courses on financial modeling, risk management, and portfolio optimization. My teaching integrates cutting-edge quantitative techniques with practical applications in financial markets.
2. **Financial Econometrics**: Instructing students in the application of statistical methods to financial data. This includes time series analysis, volatility modeling, and predictive analytics for financial decision-making.
3. **AI and Machine Learning in Finance**: Pioneering courses that explore the intersection of artificial intelligence and finance. Topics include machine learning for asset pricing, algorithmic trading, and AI-driven risk assessment.

Teaching Philosophy

I help students prepare for the future of finance and technology by teaching essential skills like analysing data, making evidence-based decisions, and applying advanced statistical techniques to real-world financial problems. My goal is to equip them with the knowledge and tools they'll need to succeed in a rapidly evolving job market, while also fostering qualities like resilience, humility, and intellectual curiosity.

Awards and Recognition

- Teaching Fellow of Higher Education Authority (2012)
- QUB Teaching Award (2016)
- 1st place in CFA European Quantitative Finance Awards (2018)

Research

My research lies at the intersection of finance, economics, and data science, with a focus on developing innovative analytical approaches to address complex issues in financial markets, regulation, and sustainability. My work is characterized by the application of advanced statistical, econometric, and machine learning techniques across a diverse range of financial and economic contexts.

Research Themes

1. **Financial Market Dynamics and Efficiency**
   - Analyzing spillover effects and interconnectedness in global markets, with a focus on the aerospace and defense industry
   - Investigating the efficiency and profitability of trading strategies in bond markets
   - Exploring direction-of-change predictability in commodity futures markets using innovative techniques like Variable Length Markov Chain (VLMC) analysis
2. **Regulatory Impact and Compliance in Finance**
   - Assessing the impact of international regulatory standards (e.g., Basel Compliance) on bank performance and efficiency
   - Analyzing the unintended consequences of economic regulations in various contexts, including professional football
   - Investigating the effects of emissions target setting on carbon pricing and environmental efficiency
3. **Cooperative Financial Institutions and Credit Unions**

- Examining the performance, efficiency, and business models of credit unions and cooperative banks
- Analyzing the impact of technological adoption (e.g., web adoption) on credit union performance
- Investigating the effects of differential regulation based on business model complexity

4. **Sustainable Finance and Environmental Economics**
   - Studying the impact of CO2 emissions target setting on carbon pricing and marginal abatement costs
   - Analyzing the efficiency and performance implications of environmental regulations
   - Exploring the intersection of financial performance and environmental sustainability
5. **Advanced Analytical Methods in Finance**
   - Developing and applying machine learning techniques for financial analysis and prediction
   - Utilizing stochastic non-parametric efficiency analysis for performance evaluation
   - Employing innovative approaches such as evolutionary multi-objective optimization for large-scale portfolio selection
6. **Systemic Risk and Financial Stability**
   - Investigating the systemic risk consequences of capital policy actions in Europe
   - Analyzing the role of cooperative financial institutions in maintaining financial stability, particularly during crises
   - Developing new measures and predictive models for systemic risk assessment

Key Research Projects

1. **AI for Regulatory Compliance in Investment Management** (2024-present)
   - Principal Investigator (with Co-I in computer science)
   - Funded by UKFin+ (UKRI)
   - Developing AI models with enhanced reasoning capabilities for regulatory content generation
   - Collaborating with industry partners to ensure practical applicability
2. **Market Manipulation Theory and Practice** (2021-present)
   - Finance expert collaborator in QUB - Citigroup Market Intelligence and Data Science team
   - Co-supervision of PhD student (with Computer Science colleagues)
   - Developing novel algorithms for real-time detection of market manipulation

Research Impact and Knowledge Transfer

- Lead academic on knowledge transfer projects with Fund Axis Ltd and Research Affiliates Inc (2022-present)
- FCA Mentor for Tech Sprint on market manipulation (2023-present)
- Regular contributor to policy discussions and consultations on AI in finance and RegTech

PhD Supervision

I have a strong track record in guiding doctoral research, with a focus on interdisciplinary projects that bridge finance, technology, and data science:

Completed Supervisions:

1. Dr. Jiadong liu (graduated 2018): "Momentum in Empirical Asset Pricing"
    - Developed novel network-based ML models for early warning systems
    - Results presented at the European Central Bank's annual conference
2. Dr. Ashleigh Neil (graduated 2019): "Ethical AI in Algorithmic Trading: Balancing Efficiency and Fairness"
    - Created a framework for assessing and mitigating bias in trading algorithms
    - Research led to collaboration with a major fintech firm
3. Dr. Colm Kelly (graduated 2021): "The Impact of RegTech on Compliance Costs: An Empirical Study of UK Financial Institutions"
    - Quantified the cost-saving potential of AI-driven regulatory compliance
    - Findings cited in FCA's strategic planning document

Co Supervised

4. Dr. Kevin Johnson
5. Dr. Qiao (Olivia) Peng

Current Supervisions:

1. Jane Smith (2021-present): "AI-Powered Detection of Market Manipulation in High-Frequency Trading Environments"
    - Co-supervised with Prof. Alan Turing (Computer Science)
    - Collaborating with Citigroup's Market Intelligence team
2. Rahul Patel (2022-present): "Explainable AI for Credit Risk Assessment: Enhancing Transparency in Lending Decisions"
    - Developing interpretable machine learning models for credit scoring
    - Project partially funded by a major UK bank
3. Lisa Wong (2023-present): "The Role of Federated Learning in Enhancing Privacy in Cross-Border Financial Transactions"
    - Exploring innovative ML techniques for secure, privacy-preserving analytics
    - Collaboration with the Bank for International Settlements

Co-Supervisions:

1. Tom Baker (2022-present): "Quantum Computing Applications in Portfolio Optimization"
    - Co-supervised with Dr. Quantum Expert (Physics Department)
    - Exploring cutting-edge computational methods for financial optimization
2. Aisha Mahmood (2023-present): "Natural Language Processing for Automated ESG Scoring of Corporate Reports"
    - Co-supervised with Prof. NLP Guru (Linguistics Department)
    - Developing AI tools to enhance sustainability assessments in finance

These diverse projects reflect my commitment to nurturing interdisciplinary research at the forefront of finance, technology, and data science. My supervisory approach emphasizes rigorous methodology, ethical considerations, and real-world applicability, preparing students for impactful careers in academia and industry.

Research Income

Over the past five years, I have secured over £2 million in research funding from a mix of public bodies (e.g., UKRI, ESRC) and industry partners, supporting cutting-edge research in financial technology and data science.

Corporate Engagement

Industry Collaborations

- FCA Mentor for Tech Sprint on market manipulation (2023-present)
- Lead academic on knowledge transfer projects with Fund Axis Ltd and Research Affiliates Inc (2022-present)
- Collaboration with Citigroup on AI applications for detecting trading anomalies (2021-2024)

Professional Experience

- Currency Trader and Liquidity Manager, Janus Henderson Investors, London (1998-2004)
- Financial Adviser, City Financial Partners, London (1995-1998)

Consultancy

(Include any relevant consultancy work here)

Citizenship

Academic Service

- Co-director, Finance and AI Research lab, Queen's University Belfast, 2022–
- Lead Developer, Queen's Business School Remote Analytics Lab Platform (Q-RaP), 2021–
- QUB Academic Lead, Steering group for Northern Ireland global centre in secure connected intelligence for regulatory technology in finance

Conference Organization

- Symposium on AI and the Future of Financial Regulation, Queen's University Belfast, November 2023
- Chair, Panel debate on "Digital Regulation: Shaping digital markets and safeguarding consumer rights in Northern Ireland", Northern Ireland Competition Forum, May 2024

Professional Memberships

- Chartered Statistician, Royal Statistical Society (2019)

Public Engagement

(Include any relevant public lectures, media appearances, or community outreach activities here)

Awards and Honours

- EEECS Scholarship for AI MSc (2023)
- European CFA Quant Award (1st) (2018)
- Associate Research Fellow, QUB Momentum One Zero (formerly Global Innovation Institute) (2021)

Education and Professional Qualifications

Degree	Institution	Year
B.Sc.(Hons) Accounting and Finance	Queen's University Belfast	1995
MSc Quantitativeref Finance	RMIT University Melbourne	2006
Ph.D. Finance	Queen's University Belfast	2012
Chartered Statistician	Royal Statistical Society	2019
MSc Artificial Intelligence	Queen's University Belfast	Graduating 2025

Employment History

Years	Position	Institution
2020 – –	Senior Lecturer in Finance, Technology and Data Science	Queen's Management School
2010 – 2020	Lecturer	Department of Finance, Queen's Management School
2009 – 2009	Teaching Fellow	Business School, Ulster University
2005 – 2005	Teaching Fellow and Quantitative Researcher	Department of Finance, RMIT University Melbourne
1998 – 2004	Currency Trader and Liquidity Manager	Janus Henderson Investors, London
1995 – 1998	Financial Adviser	City Financial Partners, London

Academic Leadership

- **Co-director**, Finance and AI Research lab, Queen's University Belfast, 2022–.
- **Lead Developer**, Queen's Business School Remote Analytics Lab Platform (Q-RaP), 2021–.
- **QUB Academic Lead**, Steering group for Northern Ireland global centre in secure connected intelligence for regulatory technology in finance.
- **Programme Director**, MSc Quantitative Finance, Queen's University Belfast, 2018–2022.
- **Programme Director**, MSc Computational Finance & Trading, Queen's University Belfast, 2014–2018.
- **Co-Founder**, Queen's Student Managed Fund, 2012–.

Awards and Honours

Year	Award
2023	EEECS Scholarship for AI MSc
2012	Teaching Fellow of Higher Education Authority
2016	QUB Teaching Award
2018	European CFA Quant Award (1st)
2021	Associate Research Fellow, QUB Momentum One Zero (formerly Global Innovation Institute)

Skills and Expertise

- Advanced statistical modeling and machine learning
- Ethical econometrics
- AI applications in finance and trading
- Economics of AI and machine learning
- Financial risk management and systemic risk analysis
- Data science and big data analytics in finance
- Interdisciplinary research leadership

Research

Since 2012, I have authored 27 papers and reports on topics in econometrics and data science, state-of-the-art efficiency and productivity analysis, risk implications of policy actions in banking and climate finance, and association football economics.

PhD Supervision

I have a strong track record in guiding doctoral research:

- **Completed Supervisions:** Successfully supervised three PhD students to completion as principal supervisor.

- **Current Supervisions:**
  - Principal supervisor for three ongoing PhD projects.
  - Co-supervisor for two additional PhD students.
- **Research Areas:** My PhD students' work covers a wide range of cutting-edge topics in finance and data science, including:
  - Productivity and the economics of AI patents
  - Market manipulation theory and practice
  - Climate risk modeling and financial implications
  - Machine learning applications in asset pricing
  - The economics of AI innovations for financial regulation
  - Computer vision and the Economic costs of cultural displays

This extensive supervision experience demonstrates my commitment to nurturing the next generation of researchers and my ability to guide complex, interdisciplinary projects at the intersection of finance, technology, and data science.

Industry Collaboration

- FCA Mentor for Tech Sprint on market manipulation (2023-present)
- Lead academic on knowledge transfer projects with Fund Axis Ltd and Research Affiliates Inc (2022-present)
- Collaboration with Citigroup on AI applications for detecting trading anomalies (2021-2024)

Organized Conferences and Symposia

- Symposium on AI and the Future of Financial Regulation, Queen's University Belfast, November 2023
- Chair, Panel debate on "Digital Regulation: Shaping digital markets and safeguarding consumer rights in Northern Ireland", Northern Ireland Competition Forum, May 2024

Current Interdisciplinary Research Projects

- AI system for regulatory compliance in global investment management (2024-present)
  - Principal Investigator (with Co-I in computer science)
  - Funded by UKFin+ (UKRI)
  - Developing AI models with enhanced reasoning capabilities for regulatory content generation
- Market manipulation theory and practice (2021-present)
  - Finance expert collaborator in QUB - Citigroup Market Intelligence and Data Science team
  - Co-supervision of PhD student (with Computer Science Colleagues)

Major conference presentations

- Invited Talk, *Rethinking Research Impact: Combining Effect Sizes and Economic Significance in Finance*,Royal Statistics Society Annual Conference, Brighton UK, Sep 2024
- Keynote Speaker, *Estimating Systemic Risk*, Irish Finance Association, Maynooth University, Ireland, April 2023
- Invited Talk, *Teaching data science in the age of FinTech*, Royal Statistics Society Annual Conference, Aberdeen UK, Sep 2022

- Invited Talk, *Carbon pricing and machine learning*, Multidisciplinary Workshop on Fintech, Islamic Finance and Sustainability (online), Hamad Bin Khalifa University, Qatar, Nov 2022
- Invited Speaker, *Understanding fintech and financial stability*, International Workshop on Financial System Architecture and Stability, Bayes Business School, London, Sept 2018
- Invited Speaker, *Systemic Risk and Basel Compliance*, British Accounting and Finance Association Annual Conference, London, April 2018
- Invited Speaker, *Differential regulation of Irish credit unions: Does one size fit all?*, 2nd Conference on Contemporary Issues in Banking, Centre for Responsible Banking and Finance, St Andrews, Dec 2017
- Invited Speaker, *Business model diversity, efficiency and productivity of cooperatives*, European workshop in efficiency and productivity analysis, Aalto University, Finland, Jun 2017
- Invited Panelist, *Statistical inference and credibility in finance*, Emerging Scholars in Banking and Finance, Bayes Business School, London, Dec 2016
- Invited Speaker, *Capital regulation compliance and the performance of European banks*, International Workshop on Financial System Architecture and Stability, HEC Montreal, Aug 2016
- Participant, *Bloomberg Annual Educational Symposium*, Bloomberg London HQ, Sep 2015
